

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name 0's and 1's

Your Name Angelina Yang

Your Team Member's Name Anika Dugh

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Game Mechs
 - Help objectPosArrayList.cpp made by the other member
 - Debugging the program so the symbol moves.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 0 and iteration 1A/B
 - objectPosArrayList.cpp
 - Food.cpp.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

In my first experience collaborating on software development for this project, my team encountered challenges with time management. Despite splitting the work into two parts, I found that we both struggled to complete our tasks within the set timeframes. The member each had individual responsibilities, but balancing these with other commitments was difficult. While the team did work well together in terms of communication and sharing ideas, managing the time effectively as a team really should be improved.
