COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   0's and 1's

Your Name   Anika Dugh

Your Team Member's Name   Angelina Yang

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
    I worked on the main logic and the main program. I worked on the Food.ccp file and ObjectArrayList functions. I wasn't able to complete them in time.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
    My partner worked on the snake movement and on the GameMechs functions. She did a very good job in making the code and getting it to work. She also did most of the commenting on the project.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.
    I think I couldn't give much time to the project and next time I would want to work more harder on projects. We started late and that lead to not being able to debug bugs in time leading to the failure of the project.
